

Release date: 19 September 2018

**A NEW LENS ON ENZYMES: AB VISTA TO SHARE NEW INSIGHTS AT FEED ADDITIVES CONFERENCE**

'Advances in enzyme application' will be presented at Feed Additives 2018, Amsterdam by AB Vista's Global Services Director. Dr Hadden Graham will discuss how advancements in enzyme mode of action and substrate understanding are helping feed producers further optimise performance and feed cost savings.

As Dr Graham explains, "the practice of superdosing phytase to target phytate (IP6) destruction has arisen from the industry recognising the nutritional benefits to be had from more complete phytate breakdown. Recent advances in xylanase research have demonstrated that xylanase enzymes have a role to play in potentiating the gut microflora to degrade more fibre."

Dr Graham shares the latest findings from AB Vista research to determine the effect of targeted enzyme application to degrade both phytate and NSP, reducing the anti-nutritive effects of both substrates.

"The net result is improved nutrient utilisation and a significant improvement in amino acids, minerals and energy, meaning diets can be formulated with higher nutrient credits delivering considerable feed cost savings and minimising waste."

Dr Graham will present on Friday 28<sup>th</sup> September 2018. Registration for Feed Additives 2018 remains open at [www.feedadditives-global.com](http://www.feedadditives-global.com)

A copy of Dr Graham's presentation will be available from Monday 1<sup>st</sup> October at [www.abvista.com](http://www.abvista.com)

**Notes to editor:**

AB Vista is an animal nutrition technology company offering pioneering products and technical services to the global animal feed industry. Since its establishment in 2004, AB Vista has grown to be a top-three player in feed enzymes and is also one of the largest suppliers of natural betaine to the global animal nutrition industry. The company invests heavily in research and development and has a growing portfolio of products and services spanning the poultry, swine, ruminant and aquaculture sectors. AB Vista is headquartered in the UK, with regional offices located in the USA, Brazil, Singapore, Spain, India, China, Germany and Finland.

AB Vista is part of AB Agri, the agricultural division of Associated British Foods, one of Europe's largest food & retail companies with a market capitalisation of £22 billion.
