CAERDAV ADOPTS THE ELMS COMPETENCE AND COMPLIANCE MANAGEMENT SOLUTION

In a move designed to improve operational efficiency, Caerdav has adopted the cloud-based Competence and Compliance Solution from leading software services provider, ELMS Aviation.

Known as the ELMS Solution, the new package will provide Caerdav with unprecedented levels of transparency, integrity and visibility of personnel competence, enhancing capabilities on both an organisational and individual basis. In turn this plays a key role in Caerdav's ambitious plans for growth and continuous improvement.

The company will also utilise the versatility of the ELMS Solution as part of its Apprenticeship Programme, helping to support its investment in the future of the next generation of aircraft maintenance engineers and technicians. The system will prove hugely beneficial to Caerdav's apprentices, as it will aid them in tracking their experience and demonstrating their capabilities throughout the apprenticeship and on into their wider career.

Joachim Jones, Group CEO at Caerdav, says: "We have ambitious plans as a business, but to meet those ambitions it's imperative that we invest in ways to both manage and develop our staff – after all, they are our biggest asset.

"ELMS is the ideal tool to help us meet these needs. Its intuitive online platform provides a quick and simple way to monitor, evidence, analyse, and subsequently improve, staff competency and training – something that will also hugely benefit our new apprenticeship programme.

"We work in a high-cost, safety-critical environment, but with ELMS supporting our staff we can focus on continuing to develop the business as an efficient, safe and compliant organisation."

Caerdav joins a growing customer base for ELMS, with the software-as-a-service (SaaS) company planning to further enhance its product offering to provide even greater support.

John Scale, ELMS General Manager, adds: "We are thrilled that Caerdav has chosen to adopt The ELMS Solution and are looking forward to supporting its digital transformation. It is

fantastic to see an ambitious and progressive organisation like Caerdav committing to this investment in its future, which will help to support its exciting business plans.”

About ELMS Aviation

ELMS Aviation (ELMS) is an ambitious software-as-a-service (SaaS) business. ELMS has developed the aviation engineering, maintenance and defence market's leading Competence and Compliance Management System.

The ELMS Solution is utilised globally by various aviation engineering and maintenance organisations that have adopted ELMS as an integral part of their Safety Management Systems (SMS).

ELMS offers a 360-degree solution to evaluate the key elements of competence – Knowledge, Skills and Attitude in a secure cloud-based platform, providing the ultimate tool to ensure compliance with the latest regulations in relation to personnel competence.

By utilising the latest cloud computing technology, ELMS has developed a solution that provides organisations with a robust management system offering first level assurance of competence standards. The solution offers real-time data with unprecedented levels of transparency and integrity to enhance management systems encompassing continuous learning and development, manpower planning, and operational efficiency.
