Carrier Transicold Increases Henry Colbeck's Refrigerated Fleet with Three New Supra 750 Units

WARRINGTON, England, April 6, 2021 — Fish and chip shop supplier Henry Colbeck has taken delivery of three new 26-tonne MAN rigid trucks, each mounted with a [Carrier Transicold](#) Supra[®] 750 unit. *Carrier Transicold is a part of Carrier (NYSE: CARR), a leading global provider of healthy, safe and sustainable building and cold chain solutions.*

The new MAN TGS trucks, which join Henry Colbeck's Coatbridge operation, replace older vehicles and feature bespoke bodies from Gray & Adams with separate access points to individual storage sections. The consistent performance and reliability of Carrier Transicold's Supra 750 unit, in conjunction with excellent aftersales support, was key to securing the order and moving Henry Colbeck closer to being an all-Carrier fleet.

"When I joined the company, my main focus was to review and improve efficiencies across the business," said Hugh O'Brien, Operations Director, Henry Colbeck. "We were running fridges from a range of manufacturers, which made keeping them all operational complicated and expensive. We took our first Carrier unit in 2013 and haven't looked back – their impressive reliability has allowed us to consolidate our

fleet in Scotland; 12 of the 13 rigids operating out of Coatbridge are now Carrier-cooled, and we'll be making it 13 as soon as we can."

The powerful Supra 750 units provide constant airflow to the compartments in the body, independent of engine speed, offering both rapid pull-down and accurate set point control. This allows Henry Colbeck to transport a wide range of chilled or frozen products to fish and chip shops, as well as restaurants, across Scotland. The new vehicles also feature Carrier Transicold's DataCOLD™ 600 temperature recorder, which provides easy access to a wealth of information on the performance of the units.

"What makes the Supra stand out from the crowd is the level of control it gives us, particularly when it comes to maintaining the integrity of the cold chain. This is something our customers have to prove when they face any health and safety inspections, so having the ability to print the relevant data directly from the unit thanks to the DataCOLD system is superb," added O'Brien.

The new vehicles join Henry Colbeck's total refrigerated commercial vehicle fleet of 33 similar 26-tonne MAN rigids, split between the company's Coatbridge site and its main base in Gateshead.

The new rigids will be in operation for five years, working five days per week and are expected to clock up around 70,000 miles per year. The Supra units are each backed by Carrier Transicold's comprehensive everCOLD™ fixed cost full-service maintenance package, which includes annual temperature control testing and certification, full regulatory checks, and access to the company's oneCALL™ 24/7 incident management service.

Now a fourth-generation family business, Henry Colbeck was founded in 1893 and is the oldest fish and chip shop supplier in the UK. The company's Coatbridge site opened in 1998, allowing Henry Colbeck to supply more than 2,000 customers across the north of England and Scotland.
