Carrier Transicold to Preview New Digital Marketplace for Parts and Accessories at Solutrans 2025

Demo new marketplace and explore Carrier Transicold's full portfolio of sustainable solutions at Solutrans at Hall 4, Stand D 065

RUEIL-MALMAISON, France, Nov. 18, 2025 – Carrier Transicold will preview a cutting-edge digital marketplace for parts and accessories for its refrigeration solutions at Solutrans 2025, held Nov. 18-22 at Lyon EUREXPO. Designed to serve as a comprehensive one-stop shop, the marketplace will offer genuine Carrier Transicold parts, along with select products from trusted manufacturers, to support the full range of refrigeration transportation repair needs. *Carrier Transicold is part of Carrier Global Corporation (NYSE: CARR), global leader in intelligent climate and energy solutions.*

“Our new digital marketplace will give customers a faster, easier way to source the certified Carrier Transicold parts they need,” said Kaan Yavas, Spare Parts Business Unit Director, Carrier Transicold. “Real-time ordering and flexible delivery options streamline the process, helping fleets operate at peak performance and enabling customers to focus on running their business efficiently.”

The marketplace will launch in 2026 across the United Kingdom, Spain and Germany, with further expansion to France, Italy, Poland and Austria by the end of the year. The marketplace will offer more than 20,000 original and genuine Carrier

Transicold parts, supporting maintenance, repair and upgrades of refrigerated fleets. Offerings will include filters, compressors, telematic connectivity kits, solar panels and more.

Carrier Transicold will leverage its extensive network of service centres across Europe to support the distribution of the marketplace's wide range of products. This regional network will enable flexible delivery options tailored to the needs of trade professionals, including pickup from designated locations or Carrier Transicold dealers, as well as direct delivery to the workshop. Express shipping will be available depending on part availability, helping minimise downtime. Every order will include real-time tracking, providing customers with full visibility from purchase to delivery.

Built for intuitive navigation, the platform will feature a search engine that allows users to explore products by category, reference number or through detailed views illustrating each component of a refrigeration unit in the form of annotated diagrams.
