New Protect+ range from TVL Security takes vehicle defence to next level

TVL Security, the UK's leader in aftermarket vehicle security innovation, has launched a brand-new product range, bringing affordable and effective next-level crime-combatting technologies to customers across the UK.

Building on the success of the existing Protect range, TVL Security's latest developments have resulted in a new advanced Protect+ offering, which brings more features, benefits and protection to customers to ensure they can go about their workdays with complete peace of mind.

Laura Moran, Managing Director, TVL Group, says: "Our existing portfolio is doing a fantastic job in keeping vans and tools secure nationwide, but we know that thieves are constantly trialling new methods to illegally access private property. That's why we're delighted to bring Protect+ to market."

While benefitting from all the previous levels of security from the original Protect range, customers opting for the new Protect+ tier will enjoy even greater levels of physical protection, including:

- A patented high-security dimple key designed to prevent authorised users from creating illegitimate copies.
- 'Floating' anti-drill pins installed within the lock's cylinder, designed to prevent thieves picking the lock.
- Anti-drill plates to defend the locking mechanism from being attacked or manipulated from the vehicle's exterior.

In addition, key replacements are also only available directly through TVL Security and will only be fulfilled once requests are validated using the Police National Computer (PNC) and the International Security Register (ISR). Legitimate owners are verified by cross-checking a unique code issued with each key – stored on the ISR – against the vehicle's registration on the PNC, which can be used to flag whether a van is marked as stolen.

Buyers also enjoy an additional year's worth of warranty with Protect+, with their purchase covered for two years rather than one.

"Our enhanced Protect+ offering has been developed through meaningful conversations with fleet managers and business owners across the country, as well as hours of research and development," adds Moran. "We are certain that Protect+

provides unrivalled quality, affordability and security performance for the aftermarket.”

Based in Brentwood, Essex, TVL Security manufactures, supplies and installs a wide array of innovative products for both sole traders and larger businesses.

ENDS

Notes to Editor
